

Design Journal – henderae

Milestone 1

04/03/2022 – Group Meeting @ 6:00 p.m.

Was unable to make it to the meeting as some other commitments ran long, and then I had to still get dinner. I found out from Helen the next day that I was put in charge of the last three bullet points of number 1 under heading 3.

04/06/2022 – Individual Work

Was unable to come to lab period because I was still sick from the day prior. Opened the document and edited some formatting. Turned the instruction description and example programs into a table format. I also finished out the code fragments (while loop, for loop, if-else statements) with our assembly translation, machine code translation, and addresses.
